

*Maax Unica* is a new extension of the *Maax* type family. It is clearly a titling variant that asserts a certain originality by having only capital letters which occasionally borrow from the forms of minuscule letters. Available in two weights - Bold and Black - this version presents a design which is particular in a number of areas, and its use will not go unnoticed. Damien Gautier has for example made the choice to emphasize certain details present in the original typeface and to emphasize its originality when compared to other available sans-serif typefaces.

Like the *Maax* typeface, this *Unica* version also has alternative characters.

Although fewer in number, they allow for a large number of variations and to adjust the silhouette of words. This typeface will clearly be suitable for the composition of titles and the creation of logotypes.

To distinguish it even further, the accents and all of the diacritical marks have a particular design. Particularly thin and not very cumbersome, they make it possible to reduce line-spacing and to obtain a dense composition which is appropriate to the spirit of this typeface with its intentionally reduced letter-spacing.

## OPENTYPE FEATURES

1. Automatically spaced capitals.
2. Punctuation is optically repositionning
- 3, 4. Specific small capitals whereas optically reduced capitals.
5. Specific glyphs in several languages.
- 6, 7, 8, 9. Specific superior and inferior glyphs.
- 10, 11. Proportional figures.
- 12, 13. Tabular figures, practical when the user needs alignment in columns.
14. Slashed zero to distinguish with letter O.
15. Standard ligatures automatically correct collision between two characters.
16. Smart ligatures.
17. Specific contextual glyphs.

## INTRODUCTION

## OWNERSHIP AND LICENCE

A typeface is created by a designer whose art is to transform an original typographic artwork into a computer file or files. As a consequence a typeface is – as a work – protected by laws pertaining to intellectual property rights and – as software – can not be copied and/or installed without first acquiring a nominative licence.

In no way, shape or form may a typeface be transmitted to a third party or modified. The desired modifications in the context of the development of a visual identity, can only be effected by the designer himself and only after acquisition of a written authorisation from 205TF.

The user of a 205TF typeface must first acquire of a licence that is adapted to his needs (desktop, web, application/epub, TV/film/videos web).

A licence is nominative (a physical person or business) and is non-transferable. The licensee can not transmit the typeface files to other people or organisations, including but not limited to partners and/or subcontractors who must acquire a separate and distinct licence or licences. The full text of the licence and terms of use can be downloaded here: any person or entity found in breach of one or more terms of the licence may be prosecuted.

## THE OPENTYPE FORMAT

The OpenType format is compatible with both Macintosh and Windows platforms. Based on Unicode encoding it can contain up to 65,000 signs\* including a number of writing systems (Latin, Greek, Cyrillic, Hebrew, etc.) and numerous signs that allow users to create accurate and sleek typographic compositions

(small capitals, aligned and oldstyle numerals, proportionals and tabulars, ligatures, alternative letters, etc.). The OpenType format is supported by a wide range of software. The dynamic functions are accessed differently depending on the software used.

\*A Postscript or Truetype typeface can contain no more than 256 signs.

ELEMENTARY PRINCIPLES OF USE

**To buy ore** By buying a typeface you support typeface designers who can dedicate the time necessary for the development of new typefaces (and you are of course enthusiastic at the idea of discovering and using them!)

**Copy?** By copying and illegally using typefaces, you jeopardise designers and kill their art. In the long term the result will be that you will only have Arial available to use in your compositions (and it would be well deserved!)

**Test!** 205TF makes test typefaces available. Before downloading them from [www.205.tf](http://www.205.tf) you must first register. These test versions are not complete and can only be used in models/mock ups. Their use in a commercial context is strictly prohibited.

---

RESPONSIBILITY

205TF and the typeface designers represented by 205TF pay particular attention to the quality of the typographic design and the technical development of typefaces.

Each typeface has been tested on Macintosh and Windows, the most popular browsers (for webfonts) and on Adobe applications (InDesign, Illustrator, Photoshop) and Office (Word, Excel, Power point).

205TF can not guarantee their correct functioning when used with other operating system or software. 205TF can not be considered responsible for an eventual “crash” following the installation of a typeface obtained through the [www.205.tf](http://www.205.tf) website.
